JOURNÉE DES NON-PERMANENT·E·S
NON PERMANENT DAY

9h30

Café - Croissants

Artificial Intelligence for automatic insect detection from camera trap - *Jean-Baptiste CARLUER* 10h00

Intraguild interactions among arthropods : starting the natural enemy cocktails - *Francisco MARTINEZ* 10h20

Use of low-coverage whole-genomes to improve the phylogenetic backbone of seed beetles (*Bruchidae*) - *Roland GODON* 10h40

Les photos de votre jeunesse 11h00

Agroecology and Soil Mites: A Vital Relationship - *Thaïs DO PRADO* 11h30

Demo-genetic approach to identify environmental conditions favorable to the maintenance of pest populations on a territory scale outside the growing season - *Ahmadou SOW* 11h50

Repas et Posters 12h00

Walid ERRAIS
Benjamin ZELVELDER

AMENEZ UN CASSE-CROÛTE
À PARTAGER POUR L'AUBERGE
ESPAGNOLE !

14h00 *Fanny HERBILLON* - Predictions of Desert locust population dynamics in a context of climate change using an agent-based model

14h20 *Mountassira MATIN* - Relative impact of Wolbachia genotype and host genetic background on cytoplasmic incompatibility in *Drosophila suzukii*

14h40 *Madeline CHAUVE* - Acceptance and preference in the Mediterranean fruit fly, *Ceratitis capitata*

15h00 Café - Quiz des non-permanent·e·s

15h30 *Flora VERSTEELS* - Assess the long-term ecological impact of invasive plants on resident communities in the Mediterranean basin

15h50 *Léa GENTY* - Effects of agricultural practices on (dis)services of field margin vegetation
